is a constitutional disease, a corruption of the blood, by which this fluid becomes viciated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous toint is variously caused by mercurial disease, low living, dis-ordered or unhealthy food, impure air, fifth and filthy habits, the depressing vices, and, above all, by the venereal infection. What-

ever be its origin, it is hereditary in the con-stitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children," Its effects commence by deposition from the

blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, cruptions or sores. This foul cor-ruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which deare suit rendered half by this taint in the system. Most of the consumption which decimates the luman family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this everywhere prevailing and fatal malady. It is com-bined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only Scrofula, but also those other affections which arise from it, such as Enurrive and Skin Diseases, Sr. Anthony's Fire, Rose, or Envirences, Pinples, Pustures, Blotches, Blains and Bolls, Tumors, Tetters and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DIS-EASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING PROM VETIA-TED OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in trath, for acrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsapa-rilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

AYER'S Ague Cure,

TROCHES

TROCHES

We are enabled here to offer the community a remedy which, while it cures the above complaints with certainty, is still perfectly harmless in any quantity. Such a remedy is invaluable in districts where these afflicting disorders prevail. This "CURE" expels the miasmatic poison of FENNER AND AGUR from the system, and prevents the development of the disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of every body; and in billous districts, where FEVER AND AGUE prevails, every body should have it and use it freely both for cure and protection. Agreat superiority of this remedy over any other ever discovered for the speedy and verrain cure of Intermittents is that it contains no Quining or mineral, consequently it produces no quintism or other injurious effects whatever upon the constitution. Those cured by it are left as healthy as if they had never had the disease.

Fever and Ague is not alone the consequence of the minismatic poison. A great variety of disorders arise from its irritation, among which are Newalgia, Rheumatism, Gout, Headache, Blindiness, Toolhack, Earnche, Catearch, Asthma, Falgulation, Painful Affection of the Spleen, Hysterics, Pain in the Bowlest, Colle, Paralysis and Devangement of the Stomach, all of which, when originating in this cause, put on the intermittent speed procedules. This "Cure" expels the mall alike. It is an invaluable protection to immigrants and persons travelling or temporally residing in the malarious districts. If taken occur is a procedule of the proposition of the spleen, they are provided to the procedule of the constitution of the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants and persons travelling or temporally residing in the malarious districts. If taken occur is the poison from the speed of the inf sionally or daily while exposed to the infection, that will be excreted from the system, and cannot accumulate in sufficient quantity to ripen into disease. Hence it is even more valuable for protection than cure, and few will ever suffer from Inter-

mittents if they avail themselves of the protecthis remedy affords. Prepared by Dr. J. C. AYER & CO., Lowell, Mass. and by Druggista and Deniera everywhere.

THE MUTUAL BENEFIT LIEE INSURANCE COMPANY.

Newark, N. J. Dividend January 1, 1881, 45 Per Cent.

The Star Spangled Banner.

O say, can you see, by the dawn's early light,
What so proudly we halled, as the twilight's last gleam ord stripes and brightfatars, through the peril-

ous fight.
O'er it e ramparis we watched, were so gallantly streaming:
And the rockets' red glare, the bombs bursting is air.
Gave proof through the night that our fing was still there:
O say, does that Star Spangled Banner yet wave
O'er the land of the free and the home of the brave?

On that shore, dimly seen through the mists of the deep, Where the foe's haughty host in deed silence reposes, What is that which the breeze, o'er the tower ng steep, As it fitfully blows, now conceals now discloser? Now it catches the glean of the morning's first beam, In full glory reface of now shides in the stream:

T is the Star panglet Banner; O, long may it wave O'er the land of the free and the home of the bravel

And where are the foes who so vauntingly swore. That the haves of war, and the battle's confusion. A home and a country should leave us no more? Their blood has washed out their foul footsteps'

No refuse could save the hireling and slave
From the terror of flight or the groom of the grave;
And the star Spangled Banner in triumph doth wave
O'er the land of the free and the home of the brave!

O thus be it ever, when freemen shall stand Between their loved homes and the war's desolation; Blest with victory and peace, may the heav'n-rescued land. Praise the power that hath mide and preserved us a ration!
Then conquer we must, when our cause it is just,
And this be our motte, "In God is our truet."
And the Star Spangled Samer in triumph shall wave
O'er the land of the free and the home of the brave?

Hawley & Merrick's well, about 2,500 barrels

To this, awful as it is to believe, The Cleve-land Plain Dealer adds this confirmation: We yesterday met with a gentleman direct from the Buchanan Farm, Pennsylvania. He says the telegraph has not, nor can not, exag-gerate the account of the burning wells on that farm. When he left, which was on Friday last, they were still in a blaze, the fi mes from some of them reaching fifty feet in height. The gas explorion was terrible, killing fifteen and fatal-

ly wounding many more.

Thousands of spectators visit the scene every day. It seems the earth is really on fire, and its elements about to melt with fervent heat. Bulwer on Matrimony-The Sacredness Marital Relations

From an interesting lecture recently delivered by Sir E. L. Balwer, the novelist, we extract the following passage:
The law that binds one man to one wo

msn is so indelibly written by nature that, whenever it is violated in general system, the human race is found to deteriorate in mind and form. The ennobling influence of woman ccases; one wife is a companion—a hundred wives are but a bundred slaves. Nor is this all: unless man look to woman as a treasure to be wooed and won-her smile the charm of his existence—her single heart the range of his de-sires—that which deserves the name of leve cannot exist, is struck out of the healthful system of society. Now, if there be a passion in the human breast which most tends to like us Price, lightness, simplicity, economy of fuel out of egotism and self-which most teaches out of egotism and sent the state of the whole moral being—it is love, as we of the north hold it and cherish it. For even when the fair spring of youth has passed, and when the active life is employed in such grave pursuits that the love of his early years pursuits that the love of romance, seems to him like a dream of romance, still that love, having once lifted him out of egotism, into sympathy, does but pass into new forms and development—it has unlocked his beart to charity and benevolence—it gives a smile to his home—it rises up in the eyes of his children—from his heart it circulates inaccomplete to the location of the location sibly on the laws that protect the hearth to the native laud that spreads around it. Thus, in the uniform history of the world, we discover that wherever love is created, as it were, and On the Buchanan Farm, Warren county, sanctioned by that equality between the sexes which the permanent and holy union of one Penn, seventeen miles from Tidioute, where a large number of oil wells have been sunk, within the past four months, with great success, on Wednesday last occurred one of the most frightful accidents that it has ever been the province of a newspaper to record. The telegraph has furnished a skeleton of the accident, but the details have not yet been made public.

A well which had been drilled over two hun A well which had been drilled over two hun and dissolute character of the East, which it overthrew, is that Greece was the earliest civ-

The Money King.

throwing from seventy to one hundred barrels an hour. Above this mass of oil, the gas of benzine rose in a cloud, for flity or sixty feet. As soon as the oil commenced guishing forth, all the fires of engines in the neighborhood were immediately extinguished. At about half past seven, as a large number of men and boys were around the well, engaged in saving the oil, the gas from the well, engaged in saving the oil, the gas from the well, which had spread in every direction, took fire, from the engine of a well the fire speaks of Baron James low and an early all the County Fairs in the State.

Our prices, at the late reduction, are as low as any of the inferior two thread chain stick machines new forced unon the unfer of unon the market. The which cannot be raveled. It is prepared the day's work for his myrmidons. Our erisin points he is unbending, but he is a gas from the well, which had spread in every direction, took fire, from the engine of a series of the county Fairs in the State.

OPENING OF THE SEASON SPRING AND SUMMER GOODS

AT P. ROSE'S. I AGAIN OFFER TO THE PUBLIC

an entire new stock of Goods in my line, just purchased in New York at the cheapest panie rates, all of which I shall stil at the smallest profits, for Cash. My customers and friends are respectfully invited to call and examine my Goods and Prices, as I am determined to sail as cheap or cheaper than any other house in the city; and as I do my own Gutting, and superintend my own ousiness, I feel assured, from my long experience in business, to give general astisfaction. The fibres of workmen are employed, and all work done strictly to time and on short notice, and warranted to fit. Stranger visiting our city would e asuit their interest by giving me a call before purchasing elsewhere.

Merchant Tallor, march 19-dly
